Evaluation sample:

According to the DGHM (German society for hygiene and microbiology) the guidance levels for whole nuts (without shell) are kept regarding the parameters analyzed.

The results refer exclusively to the examined sample (as received)

If the sampling and transport were not carried out by GALAB, it is possible that the sample may have been influenced prior by incorrect selection or insufficient cleaning of the sample containers or lack of preservation/cooling. We recommend to check any findings in this respect critically.
